FOR IMMEDIATE RELEASE

PLACING THE EMPHASIS™ IN SOUTHERN CALIFORNIA

On Tuesday, July 30th, LVH Entertainment Systems installed the first ETC Emphasis™ lighting control system in Southern California. The Simi Valley Cultural Arts Center was in the middle of a show's run, having serious light board problems, when they decided to switch to the state-of-the-art, WYSIWYG fully integrated, Dell tower-driven system. Emphasis™ is the first truly seamless fusion of the best-selling line of control consoles with the world's leading lighting-design software. Within five minutes of powering up, the system was ready to continue the show's run.

LVH Entertainment Systems, Oxnard, CA, is a leading integrator specializing in all aspects of theatrical and studio equipment from design and installation to safety surveys and renovations. For more information, call Susan Kokoszka at 805-278-4584.
